

Light up your life...

Pillow talk

A range of illuminated planters, chairs and tables in the pleasing shape of a plump pillow.

Made from tough and durable polyethylene, everything in this range is suitable for indoor and outdoor use.

Flower pot man.

2m wide and 2m tall. You shouldn't need anything larger than that.

Illuminatedplanters.com

email: sales@plantcontainershop.com

The illuminated planters and furniture are made from polyethylene and will withstand temperatures from -60°C to +80°C.

The planters have an inner wall to create an even illuminated effect. With this internal section, the planting depth is less than the overall height of the pot. Internal dimensions are shown where possible.

The illumination is provided by mains powered low energy compact fluorescent lamps in a range of colours. The body of the planter can also be coloured in some ranges.

Where possible a remote controlled RGB led lamp can be fitted. Some planters can have a rechargeable led unit fitted with each charge lasting around 5-6 hours. Lamp access is via the underside of the pot.

Internal lamp fittings are E26: Edison screw fitting, 240v. Planters are rated IP67 which means they are dust-tight and water-resistant.

Cleaning can be performed with a mildly abrasive foam sponge and a mild detergent.

The products in this catalogue are from three different manufacturers and mixing styles may result in a slightly different illuminated effect and different finishes.

All of the products on the following pages are available in a non-illuminated version in a range of colours. These also have a much deeper planting area.
